Education

University of Massachusetts Boston
BS, Computer Science. Summa Cum Laude

Boston, MA
2023 - 2026

Epoka University
BS, Software Engineering

Tirana, Albania
2022 - 2023

Projects

MAGE Platform

React, Typescript, Vite, Git – Agile Team of 5 hired to build a platform for clients MAGE engine.

- Led the front end development of the platform home page, creating and refining UI design, layout, navigation, and visual identity based on client and team feedback.
- Built and integrated React components while helping unify UI patterns across other pages and features.
- Collaborated in a 5 person Agile team with an external project stakeholder, iterating on requirements and incorporating feedback into development.

Sustainable Solutions Lab Research Assistant

RAG, React, Python, Gemini – Chatbot developed per request and review of the UMB SSL

- Collaborated on a deployed RAG chatbot with a large team, under the supervision of the University SSL staff, creating a chatbot that answers FAQ about the Sustainable Solutions Lab research using a corpus of lab documents.
- Improved AI response logic and efficiency, by refining retrieval & generation behavior, while also working on UI to meet branding and client requirements.

LLM Evaluation & Parameter Experimentation - Game Review Bot

Machine Learning Course – Assigned and reviewed by Meta Engineer

- Configured a cloud based environment to run a pretrained model, managing dependencies and GPU/CUDA requirements.
- Experimented with different model sizes and generation parameters, including temperature and sampling settings to analyze their effects on generated reviews.
- Evaluated model outputs against human written reviews using AI based judges and quantitative metrics to compare quality across configurations.

Experience

CVS Health

Sales Associate

Reading, MA
Feb 2024 – Feb 2025

- Identified inefficiencies and resolved workflow in high pressure environments, applying structured problem solving.
- Executed multiple tasks at the same time, under tight time constraints with consistency and accuracy, demonstrating initiative, and discipline.

One Albania (Telecommunications)

Front Desk / Tech Support

Tirana, Albania
Jun 2021 – Jun 2023

- Provided technical support for mobile, network and software issues, while assisting customers with front desk requests.
- Showed proficiency in learning and using company software to increase efficiency in daily workload and streamline workflow, allowing more attention to customer needs and other work.

Technical Skills

Languages: C, C++, Python, Java, TypeScript, JavaScript

Web & AI: React, Vite, Node.js, Supabase, RAG, LLMs, Prompt Engineering

Systems & Foundations: Linux/Unix, Git, CUDA, Compiler Design, Systems Programming, Cryptography, Networking
